Faster time-to-value

Jira is the foundation for empowering enterprise agility with a balance between autonomy and coordination.

Increased visibility

Jira Align connects the work happening in agile teams to the bigger picture of investments, strategy and business outcomes.

Dev + Ops that flow

Atlassian combines data and insights across our tools and 3rd parties to help you deliver better outcomes faster and continuously improve.

CONTEXTUAL INSIGHTS

Get actionable insights

Surface relevant data about your team's plans and progress at the right time and place

Move work forward

Identify blockers and get to a resolution faster.

Continuously improve

Empower your team to easily track progress and improve based on data

The screenshot displays the Jira interface for a project named 'Nucleus'. The main view is the 'Backlog' for a 'New sprint' (13 issues) running from 3/Jan/19 to 7/Feb/19. The backlog items are listed with their IDs, titles, and labels. An 'Insights' panel is overlaid on the right, providing a 'Sprint commitment' overview (55 points, on target of 54-65) and an 'Issue type breakdown' showing that the majority of issues are 'Stories'.

NEW IN ADVANCED ROADMAPS

Visualize dependencies

Get ahead of dependencies across your org with the dependency map

Communicate better

Share specific views of your roadmap or embed a live roadmap into Confluence to add additional context

The screenshot shows the Jira Roadmap interface for the 'Travel Booking Division'. The main content area displays a table of issues with columns for #, Issue, Status, Start date, and Due date. The issues are organized into teams: Android Team, iOS Team, and Web Team. A Gantt chart view is visible on the right, showing the timeline of each issue. A 'SAVED VIEWS' dropdown menu is open, listing various views such as 'FY22 overview', 'Top-level planning (current)', 'Sprint capacity management', and 'Dependency management'.

Faster time-to-value

Open by default, but great together. With Atlassian, teams can accelerate time to value while reducing risk.

Increased visibility

With Jira as the backbone and source of truth for DevOps, we abstract the complexity of making a diverse tool chain feel like an all-in-one.

Dev + Ops that flow

Atlassian customers will reduce cycle time through automation and insights.

OPEN DEVOPS

Accelerate velocity and improve quality

Building exceptional software requires the best tools for the job. Atlassian Open DevOps enables organizations to use the tools they need to deliver better software, faster.

Empower your teams with aligned autonomy

Open DevOps gives dev teams the ability to use the tools that enable them to do their best work while staying aligned to the organization.

Intelligent incident
investigation

Automated Runbooks

The screenshot displays the Jira Service Management interface for an incident. The browser address bar shows 'jira.com'. The top navigation bar includes 'Your work', 'Projects', 'Filters', 'Dashboards', 'Insight', 'Apps', and a 'Create' button. A search bar is located on the right. The left sidebar shows the 'IT help' service project with a 'Back to Project' button and a list of incident queues: 'Unassigned' (10), 'Under investigation' (16), 'Major incidents' (8), and 'Resolved incidents (l...)' (12). The main content area shows the incident 'INC-3245' with the title 'The payment system isn't loading' and a 'MAJOR INCIDENT' label. It includes options to 'Create subtask', 'Investigate', and 'Link'. A user 'Molly Clark' is noted as having raised the request via the Portal. The description states: 'My team are reporting that they the payment platform won't load and they're worried they won't be able to pay out contactors on time.' The urgency is set to 'High'. An impacted service, 'Payment service', is listed. The 'Activity' section shows filters for 'All', 'Comments', 'History', and 'Worklog', with 'All' selected. At the bottom, there are options to 'Add internal note', 'Reply to customer', and 'Update Stakeholder'. The right sidebar shows an 'Open' dropdown, 'SLAs' with a '1h 30m' time to resolve, and a 'Details' section with fields: 'Major Incident' (checked), 'Priority' (Critical), 'Request type' (System problem), 'Reporter' (Molly Clark), 'Assignee' (Jie Yan Song), 'Linked alerts' (View 1), 'Stakeholders' (Manage), 'Chat channel' (Open #INC-3245), 'Conference call' (Join call), and 'Responders' (2 Responders).

DYNAMIC SERVICE & ASSET MGMT

Single source of truth across dev and infrastructure

Flexibility to support any type of object from any team

The screenshot displays the Jira Service Management interface for a deployment request. The main header shows 'Jira Service Management' with navigation options like 'Your work', 'Projects', 'Filters', 'Dashboards', 'Insight', and 'Apps'. A search bar and a 'Create' button are also visible. The current view is for a deployment request titled 'Deployment #321 for refactor transaction logic' with a status of 'Waiting for approval'. Below the title are options to 'Link Issue', 'Link page', 'Schedule change', and a menu icon. A notification states 'This request requires your approval'.

An 'Object graph' modal is open, showing a central 'Transaction service' node connected to several other services: 'Billing order fulfillment', 'Billing ux service', 'Accounts service', 'accounts-securekeystore', 'accounts-compute', and 'accounts-api-gateway'. The 'Transaction service' node is highlighted with a blue border. To the right of the graph is a details panel for the 'Transaction service' with the following information:

- Key: CI-2594
- Description: Responsible for external transfers and interbank to bank transfers.
- Status: IMPACTED
- Type: Technical service
- Tier: Tier 1
- Incident responders: Transactions team
- Change approvers: Core Platform Council
- Associated project: Bancly IT
- Repository: transaction_platform
- Depends on: Accounts service, Billing order fulfillment, Billing ux service

At the bottom of the page, there is a table with the following data:

Impact	Significant / Large
Urgency	Medium
Change type	Standard

Rule is run when a new comment is added to an issue.

Issue created
Rule is run when an issue is created.

CHATOPS AND VIRTUAL AGENT

Seamless conversational ticketing

NLP driven virtual agents

A screenshot of a chat interface. At the top, it says "34". Below that, there are several chat messages from a virtual agent. The first message is from "Molly Clark" at 9:30 AM. The second is from "Harris" at 10:03 AM. The third is from "Annika Rangarajan" at 11:50 AM. The fourth is from "Andres Ramos" at 12:45 AM. At the bottom, there is a text input field with the placeholder "Message help-bancly-it" and a send button.
